

## NDI Technologies, Inc - C#/.NET Software Developer - Longwood, Florida

NDI Technologies, Inc. ([www.nditech.net](http://www.nditech.net)), an Longwood, Florida (Orlando) based software developer providing innovative software solutions geared toward the education and law-enforcement markets throughout the United States and Europe, has an immediate opening for a Senior C#/.NET Software Developer.

### Position Description:

This posting is for a full-time Senior Software Developer position specializing in C# and .NET. This individual will design, maintain and participate in all phases of NDI's software development process which includes requirements analysis, specification generation, application design, software coding and testing of Windows based software products. This person must have strong technical design, software development, C# and .NET syntax level coding expertise, interpersonal/teamwork skills and must be motivated to work on both product architecture, development, testing, QA, implementation and configuration for all NDI product initiatives.

**\*\*\* JUNIOR POSITION ALSO AVAILABLE – Please inquire if interested. \*\*\***

### Responsibilities:

- Participate either alone or on a team in the full lifecycle of all NDI Technologies software, including, but not limited to: research, design, development, testing and maintenance.
- Design and implement new software features and improve existing features.
- Investigate, locate and fix coding defects.
- Write complete documentation, including in-code comments, design documentation and others.
- Provide on-demand support for NDI's customer service to help resolve customer issues, interacting directly with customers as appropriate.
- Communication of estimates and status updates on assigned projects.
- Comply with coding standards or implement new standards as necessary.

### Requirements:

- Expert level C# and .NET skills required, with demonstrated ability to resolve complex problems.
- Windows development environment experience is essential.
- In-depth understanding of object-oriented programming concepts, operating system fundamentals, database fundamentals and computer networking.
- Must have a high degree of analytical, organizational, verbal communication and written skills.
- Display considerable independence and creativity.
- **Character** An eagerness to excel and be part of a dynamic fast growing team; excellent judgment; superb problem-solving skills, tenacity and will; professional, positive, and energetic attitude; attention to detail and the ability to learn quickly; ability to work independently and as part of a team.
- **Commitment** Able to set and meet goals; sincere care for others; full-time champion of NDI and company brands.
- **Leadership** Highly motivated self-starter; strong leadership and teamwork qualities; decisive; open-minded; excellent time management skills.
- **Must be eligible to work in the U.S. for any company without sponsorship.**

### Qualifications:

B.S. in computer science or related field

Experience developing high performance and scalable enterprise level Windows applications.

**Salary:** Salary commensurate with experience. Health plan, paid holidays/vacation, great working environment.

### Company Profile:

NDI Technologies, Inc. is a dynamic and fast-growing firm that respects creativity and talent and provides a working environment that fosters skills development, team-oriented goals and individual growth. With a diverse product base and team-oriented work environment, there are continual opportunities for maximizing one's abilities as well as garnering new skill sets. NDI Technologies maintains a work environment that is client-focused and detail-oriented, with an emphasis on organization and follow-through. It is imperative that the ideal candidate has personal and professional characteristics that are reflective of the company and its corporate goals. **NDI Technologies, Inc. is an Equal Opportunity Employer and a Drug-Free Workplace.**
